Case rate (**Bottom number in map**) reflects the occurrence of new disease in a population during a specific time period. (per 100,000)

# Definitions

**Active Cases:** is calculated by  $((\text{total cases}) - (\text{recovered cases}) - (\text{deaths}))$  within the same time period.

**Total COVID-19 Cases:** includes lab confirmed and probable cases of Defiance County residents

**Probable Case CDC Expanded Definition:**

- Person who exhibits symptoms consistent with COVID-19
- Patient seen in outpatient or telehealth setting with no alternative likely diagnosis
- Must have an Epidemiological (close contact) link. A person who has been in contact, or is in an institution, with a lab confirmed case **and** meets the criteria above.

**Number of COVID-19 Cases Hospitalized:** Defiance County resident who were hospitalized during the reporting range

**Number of Cases Recovered:**

- At least 1 days (24 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications **and**
- Improvement in respiratory symptoms (e.g., cough, shortness of breath); **and**,
- At least 10 days have passed since symptoms first appeared

The Ohio Department of Health defines Presumed Recovered as cases with a symptom onset date >21 days prior who are not deceased. Therefore, the Ohio Department of Health and Defiance County Health Department cases recovered may differ.
